Title: E-Learning Platform Mobile App

Name: Archit Mahajan

Roll NO: 26

Section: A

Semester: VI

Branch: Artificial Intelligence

Subject Teacher: Prof Krupali Dhawale

Introduction

The E-Learning Platform Mobile App is designed to help students easily access their courses and learning materials through their mobile devices. Students can view course lists, watch video lectures, submit assignments, and track their learning progress in one place. Many students face difficulty managing different learning resources across multiple platforms. This application provides a simple and user-friendly interface that allows students to quickly navigate through courses and monitor their academic progress efficiently.

Objective

The objective of this project is to design an intuitive mobile application interface using tools like Figma. The app focuses on improving the online learning experience by providing easy access to course lists, video lectures, assignments, and progress tracking. The interface is designed to be simple, organized, and user-friendly so that students can efficiently manage their learning activities from a single platform.

Tools Used

- Figma
- Icons from UI libraries
- Mobile UI design components

Wireframes of Application Screens

Home Screen

The home screen acts as the main dashboard of the application. It allows students to quickly view their courses and continue learning.

Features:

- App header with platform logo and notification icon
- Search bar to search courses
- Course cards displaying course image, title, instructor name, and rating
- Progress bar showing course completion percentage

Courses Screen

This screen displays all available courses and allows students to browse different learning topics.

Features:

- List of course cards with course images
- Course category tags and ratings
- Instructor name and course title
- Progress indicator showing completed lessons

Assignments Screen

This screen allows students to submit assignments and check their results.

Features:

- Assignment submission section with upload option
- Submit Assignment button
- Assignment status (Submitted / Graded)
- Score display for completed assignments

Progress Dashboard Screen

The progress screen helps students track their learning performance.

Features:

- Chart showing learning progress
- List of enrolled courses with progress bars
- Percentage of course completion
- Button to view all courses
- Achievements section showing earned badges
- Bottom navigation bar for quick access to other screens

UI Design Principles Applied

Consistency

The same color scheme, fonts, icons, and layout style are used across all screens of the application to maintain a consistent and familiar user experience.

Simplicity

The interface uses a clean layout with minimal elements so that users can easily browse courses, watch lectures, submit assignments, and track their progress without confusion.

Visibility

Important features such as search, course cards, assignments, and progress tracking are clearly visible and easy to access, helping users quickly find what they need within the app.

Icons, Colors, and Typography

Icons

Simple and recognizable icons are used for different sections of the application such as:

- Home
- Courses
- Assignments

- Progress
- Profile

Colors

A modern and student-friendly color scheme is used:

- Primary Color: Blue/Purple gradient (represents learning and innovation)
- Secondary Color: White (provides a clean and simple interface)
- Accent Color: Dark blue for progress indicators and highlights
-

Typography

Clear and readable fonts are used such as:

- Headings: Bold Sans Serif
- Body Text: Regular Sans Serif

Prototype Flow

The prototype demonstrates how users move between screens:

1. **Home Screen → Courses Screen**
   User taps on the courses section to view all available courses.
2. **Home Screen → Video Lecture Screen**
   User selects a course and opens the lecture to start learning.
3. **Search Screen → Assignments Screen**
   User navigates to the assignments section to submit or check assignment results.
4. **Location Details → Progress Dashboard**
   User taps “View Progress Dashboard” to track overall learning progress.

This flow helps users easily navigate between courses, lectures, assignments, and progress tracking within the application.

Conclusion

The E-Learning Platform Mobile App provides a simple and efficient solution for students to manage their online learning activities. By applying effective UI design principles such as simplicity, consistency, and visibility, the app ensures a smooth and user-friendly experience. The prototype demonstrates how students can easily browse courses, watch video lectures, submit assignments, and track their learning progress within the application.
